## CHINOOK OLD TIMER LEAVES

Mrs. Hodgson and sons left on Friday for their home at Winnifred, Alta. They were accompanied by their uncle, Mr. Lou Setterington, who will hereafter make his home with Mrs. Hodgson.

We feel we cannot allow this fine, Christian gentleman to leave our midst without a few remarks on a life which, though lived alone, has done so much for the benefit of the people among whom he has lived.

His door was always open and his hand always ready to help.

Unostentatious in character he has done more for humanity than perhaps any other person in the district.

Though reticent in disposition, he nevertheless possessed a spirit of enterprise and perseverance which led him into, and gave him experience in, many walks of life.

Mr. Setterington not only a pioneer of Alta., but of the West.

In 1879 he left his home in Leaming on, Ontario, and came to Winnipeg which place was then designated by a few small buildings on Portage Avenue Notre Dame and Main St. and by "Old Fort Garry."

For three years he worked there on construction work, after which he traveled through the vast unsettled planes to Calgary. There was then not a house between Brandon and Calgary. Regina and Moosejaw were not on the map.

Calgary was then a hamlet consisting of five log houses, a Mounted Police Barracks, two stores, one owned by J. D. Baker and the other by the Hudson Bay Co.

In 82 and 83, Mr. Setterington worked on the construction of the C. P. R. from Calgary west through the Mountains. There was not a house west of Calgary -- only an Indian settlement at Morley. The now flourishing and beautiful town of Banff was then a rocky, wooded mountain side.

In 84 Mr. Setterington returned as far East as Port Arthur where he again helped forge a way for the C. P. R. through the rocks of that Northern country. Following this he ran a boat on the Great Lakes for three years, after which he operated a general store in Rat Portage, now Kenora.

He later farmed for some years at Bagot, Man., coming as one of the earliest settlers to Chinook in 1909 where he located scrip, also a homestead and pre-emption. Since then he has been engaged in farming, working alone, a whole section of land.

We deeply regret that ill health has forced Mr. Setterington's removal from our midst but are most happy to know that for the remaining years of his life he will enjoy the comforts of a home and kind care of those who love him.

## Chinook Consolidated S. D. School Meeting

The Board of Trustees of Chinook Consolidated S. D. No. 16 met in the school on Saturday evening, Sept. 28th at 8 o'clock.

Members present Messrs Bell, Dressel and Rosenau.

The minutes of last meeting were read.

Rosenau, that these minutes be adopted as read.

Then followed the reading of the correspondence and of bills presented for payment.

Dressel, that payment of following bills be approved.

Prov. Treasurer inspection of boiler \$5.00

Chinook Trading Co. 18 03

C. E. Barry work on well 6 00

Rosenau, that the following additional arrangements for van driving be approved.

Route 1 — W. Gallagher, Sept. 16th, further notice.

Route 3 — D. E. Bell Sept. 3 Sept. 13th. — W. Seeger for H. Butts Sept. 16 Oct. 4th. — N. Schmidt Oct. 1 further notice.

Route 4 — R. Peyton Sept. 3rd 6th. — R. G. Whelan for Mah Bros. Sept. 9th, Oct. 4th — D. Boise Oct. 7th, further notice.

Route 5 — Cooley Bros Sept. 3rd. 27th

Route 6 — Wm. Lee Sept. 3 27th.

Route 7 — R. B. Langley Sept 3rd, 13th. — Gus Cook Sept 16, further notice

His unfailing kindness and sterling qualities of character have left a loving memory in the hearts of his friends, which even time cannot efface.

We hope to see his kindly face in our midst again.

Mrs. W. W. Isbister

Dressel, that Teachers Convention be invited to Chinook, Tuesday, if one be held in this inspectorate.

Dressel, that supplies as requested by assistant teachers be ordered.

Rosenau, that we do now adjourn.

Lorne Proudfoot H. A. Morrison is relieving Secretary Mr. Youell at the Station,

## CROP TESTING PLAN

Over 20,000 farmers' fields of wheat have been tested under the above plan during this past month. Some 6,000 samples graded "A," indicating they were sufficiently true-to-variety to be used for seed. Any National Elevator Agent will supply the names of those farmers in your district whose samples graded "A."

## 'SALADA' TEA

### Controlling The Rust Menace

Very little reflection is required to demonstrate that an expenditure of ten years' intensive work by trained scientists and \$600,000 of coin of the realm is a low price to pay for insurance of Western Canada's future wheat crops against the appalling loss which a few days of rust infestation can levy against the farmers of the West.

The \$600,000 referred to and the ten years spent in work in the laboratory and the field, it was recently announced, is the cost to the nation to date of producing an unnamed wheat which, according to authorities, is able to withstand a rust epidemic unscathed and at the same time produce a kernel with all the desirable attributes of the best commercial varieties of bread wheat.

Coupled with this announcement was the further statement that this new wheat can be multiplied to a sufficient extent at Dominion government experimental farms and on private lands under government supervision to enable a general distribution of seed to be made to the farmers of the west in 1937.

These announcements were accompanied by a further declaration of considerable importance, namely, that the government intends to retain control of the source of supply of this valuable seed and to see to it that the farmers are not exploited by private concerns in connection with its distribution.

The statement means that the farmers of Western Canada will be able to secure in two years time a substantial supply of seed wheat that is guaranteed to enable them to grow a crop completely immune from ravages by rust, and at a reasonable price, probably at cost.

It is perhaps a coincidence that these announcements were made at a time when Western Canadian wheat crops were hit by the worst infection of rust that the west has known in history but the information followed in new heart into the many thousands of farmers who this summer saw their hopes of recovery blighted when millions of rust spores descended on the most promising crop in years and slaughtered yield and grade which meant reducing price to the vanishing point.

The news given in these important announcements may well mean that 1935 will be the last time that Western Canadian farmers have to suffer tremendous loss from rust infestation. This statement is made with caution, however, for although it is not usual for severe rust infestation to follow in successive years, it cannot be stated affirmatively that it will not occur again before sufficient of the new wheat is grown to make a repetition of the 1935 calamity an impossibility.

Results of the work that has been done during the ten years' quest for a rust resistant wheat and laboratory and field trials of the strains which have been produced, however, appear to indicate that the battle against rust has been won by the scientist and agronomist.

There is additional comfort for the farmer, however, in another coincident announcement and that is that some of the five strains of rust resistant wheat which are being increased this year also show a tendency to resist other diseases, those mentioned specifically being stinking smut, leaf rust and one of the varieties is reported as "moderately resistant" to loose smut.

So that it is possible that while the experts have won their fight against rust they have at the same time scored at least partial victory in the battle against some of the other diseases to which wheat is heir. To what extent against these other disease pests have been overcome while the major conflict was being waged time and experiment alone will prove. It is safe to say, however, that these apparent advantages will be followed up with the same vigor that these scientists have shown in their now successful efforts to overcome the major enemy.

Definite proof that the new wheat is all that is claimed for it exists as a result of field trials and laboratory tests which have been made during the ten years the work has been in progress and particularly this season.

In field plots the new wheat showed up clean and bright while alongside it the other standard varieties of commercial wheat were sick with the disease. Laboratory and commercial tests have proven conclusively that the new wheat has milling and baking qualities equal to that of Marquis and Reward.

The tests have demonstrated equally conclusively that the new wheat has the requisite length and strength of straw, yield, earliness, appearance of kernel and weight per bushel possessed by the best of the present day commercial varieties.

In other words the new wheat fills all the requirements of the type of hard spring wheat which has made Western Canada famous in the world's bread markets and has the additional ability to withstand rust, and perhaps to withstand some of the other diseases which periodically take toll of the Western grain farmer.

**Radio Clock Patented**  
Radio clock which requires no winding has been patented at Prague. Known as a "radio clock," which can be operated from a distance of 500 miles, it has as works a small receiving set to guide the progress of the hands. The exact time is recorded on the basis of astronomical data.

The tunnel which Persian troops dug under the wall of Dura to capture the city in 256 A.D. has been uncovered by archaeologists.

#### New Name Sought

Scores of letters have been received by J. R. Macdonald, Stipendiary Magistrate of Hull, England, offering alternatives to the word "dole," for which he offered a prize of \$2.50. So far not one suggestion is regarded as good enough for the award. One writer sent a list of 65 alternatives.

The reversible snake-lizard travels backwards or forwards equally well.

Ninety per cent. of the world's nickel supply is produced by Canada.

#### Empress Of Ethiopia

Claims She Is Descendant Of Queen Of Sheba

Through all the worries and anxieties brought upon him by Italy's threatened conquest of Ethiopia, Emperor Haile Selassie's most devoted companion and counsellor has been his wife, Empress Walzeru Menen. Gifted with uncommon intelligence, astuteness and foresight, the 41-year-old Empress urged the Emperor not to yield to Mussolini's threats but to defend the kingdom to the last.

Emperor Haile Selassie is Walzeru's fourth husband. Maybe that is why she is called the "Queen of Kings." They have three sons and three daughters. They have been married 23 years, and it is said they have never had a quarrel. The Emperor like most of the higher-caste Ethiopians, is monogamous. Walzeru is his only wife.

"Walzeru" means literally "Lady of Quality." She is the daughter of a famous provincial prince, and has a very dignified and aristocratic bearing. She was educated by private tutors. The "Queen of Kings," who is fat, not fair, and 40, claims to come from the same Hamitic stock as the famous Queen of Sheba who ruled Ethiopia 3,000 years ago. She also claims descent from the glamorous Cleopatra. She is addressed by her ten million native subjects as "Your Serene and All-Just Majesty." She signs herself "The Conquering Lion of Judah hath conquered."

The Empress speaks no language except the ancient Amharic, which is of Semitic origin. All attendants who approach her shield their mouths with their white shamma (shawl).

#### Dionne Quintuplets Bowl

Smartly Designed Bowl Is Offered As A Gift

A surprise gift offer which will interest every parent, every child and, in fact, everyone who has ever heard of the world-famous Dionne Quintuplets, has been announced. The article offered is a cereal bowl created in honour of the five little sisters and called the Dionne Quintuplets Birthday Bowl. Made of shining lifetime chromium, it is six inches in diameter, smartly designed in five lines, and embossed inside with a charming sculpture of the "Quintuplets." On the rim are engraved the names of the babies—Emile, Annette, Marie, Yvonne, and Cecile. Besides being an ideal cereal bowl for a child, it makes a distinctive olive and celery dish or bon-bon dish.

Readers can obtain this delightful gift by sending two Quaker Oats trademarks and 15c to help cover postage and handling charges. To The Quaker Oats Company, Saskatoon, Sask.

#### Heaviest Air Passenger

United Air Lines Carried Judge Who Weighed 400 Pounds

When County Judge A. W. Dulweber applied for a ticket at the United Air Lines office at Omaha the booking clerk was in a quandary. The judge weighs four hundred pounds and is probably the heaviest in the world. The clerk did not wish to offend him, but at the same time wondered if he could book him on board an aeroplane on only one ticket. The company were pleased to take him without extra charge, however, as the judge was undoubtedly the biggest passenger they had ever carried, and they wished to mark the occasion.

#### A Strange City

Queer Place In Derbyshire, England Has Only Eight Houses

A strange city may be found in England within two miles of Chesterfield's famous crooked spire. It is another Derbyshire curiosity. Down a winding bridle-path is Tapton City—the queerest and smallest city in the world. It has only eight houses and 25 inhabitants. It is the city of nothings, for there is no church, no chapel, no public-house, no shop, no post office. No electricity or gas is found there—they use oil lamps. How or why it became a city nobody knows, but it is believed to have been founded on the ashes of a Roman camp.

The vast unexplored continent at the South Pole, Antarctica, is believed to be about the size of the United States and Mexico combined. Geographers are not certain that it is one large continent; it may be made up of islands.

The possibility of travelling to the moon by means of "a flying chariot" was discussed by a scientific-minded bishop in England in the seventeenth century.

The temperature of one of the sun's spots is about 4,700 degrees centigrade. This is about 1,000 degrees cooler than the sun's spot-free surface.

#### New Type Flying Boat

Soviet Aviation Authorities Try Out Parachute Kite

A passenger and freight-carrying "parachute kite," which Soviet aviation authorities said they believed would be able to ascend into the stratosphere, had its first successful trial lifting four tons of cargo.

An ordinary freight parachute, with a dome 65 feet in diameter, was used. The load was attached with short ropes leading from one side of the parachute. The other side bulges upward, giving the lifting power. Longer ropes, running from the bulging side, also were attached to a load which, for passenger-carrying purposes, would consist of a gondola. By manoeuvring the longer rope, the crew, experts said, could steer the parachute and control its ascent and descent.

The whole combination load was called a "parachute train" in the official description by Prof. I. Gromofsky, chief of the experimental institute of the Commissariat of Heavy Industry which is sponsoring the trials. Gromofsky said he believed the parachute could carry explorers into the stratosphere and described flying in a parachute kite as the safest mode of air travel since the parachute is always open, assuring a safe descent.

#### Exporters Must Be Careful

Warned Against Sending Goods To Italy Without Guaranteed Payment

The Department of Trade and Commerce said it had received a cable from the Canadian Trade Commissioner at Milan warning Canadians against exporting goods to Italy without first taking careful steps to ensure payment.

The cable, sent by A. B. Muddiman, urged careful dealing with Italian importers because of exchange restrictions by the Italian government. "No shipment of goods should be made from Canada to Italy unless the Italian importer has given assurance he has obtained an import permit from the Italian authorities allowing the importation," it said.

#### Only Four Feet Wide

Philadelphia Is To Have Narrowest Building In U.S.

A building being erected at Philadelphia, Pennsylvania, will, it is believed, be the narrowest in the United States. It will be only four feet wide. The site of the building is all that is left of a corner plot from which the city allied most of the ground in order to widen a street. The new building will be constructed of stainless steel, and half of it will contain a restaurant which will have a front which can be removed in summer.

More than 1,300 persons of London's population claim the high seas as their birthplace. Of these sea babies, more girls are born than boys.

Eighty per cent. of the new radio in England were bought on time.

### SEND FOR THIS GIFT! DIONNE 'QUINTS' BIRTHDAY BOWL

Send to anyone for 2 Quaker Oats trademarks and 15c to help cover postage and handling charges. Send To The Quaker Oats Co., Saskatoon, Sask.

● This offer is made to celebrate the selection of Quaker Oats as the cereal for the Dionne Quintuplets, even before their first birthday. You will love this souvenir. A beautiful design in lifetime chromium, 6" in diameter, useful for serving many things. Send now to address above.

#### Liner Gangway Blocked

Passengers At Southampton Held Up By Thousands Of Bees

Thousands of bees held up passengers about to embark on the liner Moldavia at Southampton, England. The bees settled down comfortably at the foot of the passenger gangway and defied attempts to move them. A hose was tried, but this merely incited the bees, and caused them to buzz in clouds, scattering onlookers. Eventually order was restored, and embarkation proceeded.

#### Transmits Sound And Vision

Television In Germany Covers Distance Of Nearly 50 Miles

A great advance in television service has been achieved by a transmission from Witzleben to Gildenhall, Germany, a distance of nearly 50 miles. The transmission, both for sound and vision, is stated to have been very good. Dr. M. Hadamowski, head of the German broadcasting service, was seen and heard by the men of the labor camp at Gildenhall, whom he addressed. Afterwards, news pictures were transmitted with results reported to be equally satisfactory.

The catfish gets its name from the cat-like whiskers and purring noise it makes when caught.

## MISS ALADDIN

—By—  
Christine Whiting Farmentor  
Author of  
"One Wide River To Cross"  
"The Unknown Port", Etc.

### SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her in-

duigent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's.

There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy and Matthew Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Columbine residence all lit up, and asks Matthew if he knows why. He said: Let's go in and see. Then Nancy learns that she is having her debut but in a different setting than had been planned for her in Boston.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adam, and Nancy go to the prairie home of Matthews' uncle for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard.

### Now Go On With The Story

#### CHAPTER XVIII.—Continued

Where that empty milk can came from they never knew; but for a while it created not only diversion, but a feeble warmth that was warmly welcome. With the aid of a pocket knife Jack ripped the leather covering from the seats, and used excellent stuffing for a fire. School books came next, but not until darkness was descending and all hope of seeing the missing driver was given up.

"I'd go for help," Jack told his sister grimly, "but even if the road weren't drifted, I'd never make it with night coming on. We've been here about four hours, haven't we? It seems a lifetime already, and these youngsters have been here a good while longer. If things aren't better in the morning I'll have to go. Nancy. Have you noticed" (he lowered his voice), "those twins are getting drowsy, both of 'em, and so's Paul Evans. I can't tell whether they're just sleepy, or—or— Look here, sis! It's up to us to keep them moving!"

Darkness came fast; but slowly, terribly slowly, it seemed to Nancy, hour after hopeless hour dragged on. Wild wind still raged about them, and at the back of the bus a snow-drift had collected, sitting in through the broken window and making their cramped space smaller still. Though all worked desperately to keep the fire burning, a sudden, especially fierce gust had blown it out; and there were no more matches. Jack had pure sine relinquished his sheep-lined jacket; and Nancy's knitted scarf was pinned securely about a shivering boy.

Pretense at games—prancing up and down the aisle—anything to keep blood circulating in those small, cold kiddies, was kept up valiantly; but as night descended the children who were not crying had dropped asleep, huddled together in a corner, and tears of fright and pity dimmed Nancy's eyes as she looked down at them.

Though that interminable night a grim and silent Jack kept moving constantly, stopping at every turn to rub the legs or arms of some small sleeper. Nancy, exhausted, sat for a time, holding within her coat a boy of seven who whimpered with the cold. Later, when a semblance of warmth returned to him and he dropped asleep, she too arose to move about the crowded quarters, and like her brother, chafe numb hands and feet.

Down came at last, and the storm had not abated. 2118

"But we're alive," said Nancy, teeth chattering as she tried to speak. "We're all alive."

Jack faced her suddenly. Almost it seemed that he was angry.

"And how long will we last? How long, I ask you?" He raised a foot and she saw a bare leg above the shoe. "I put my socks on, Joey Miller three hours ago when you were nodding. That boy's all in, Nancy; and some of these little girls won't live the day through unless help reaches us. If we had food it might put new life into them; but every lunch pail's empty and—"

He stopped, silenced by a moan from some one in the huddled mass, and lifting a child, worked at her stiff legs in desperation. It was, Nancy saw, the twin who wore her sweater; and suddenly the girl was pulling off her wollen stockings while Jack protested: "You keep those on, sis! Say, are you going crazy? Do you want to freeze to death? You're in this silk undies now. I know it. You can't sneak out of that knitted thing a while ago. Damn you, Nancy Nelson, you keep those stockings on!"

Nancy said nothing. Jack was, she understood, half crazed with anxiety for all those helpless children and herself as well. Slipping bare feet into her shoes again, she knelt to pull her warm hose over the icy legs of the small sufferer; while one of the girls, watching in silence, struggled out of her coat and buttoned it about her little sister.

Nancy threw her a smile, a drawn, and smile that Cousin Columbine wouldn't have recognized.

"Come help me, Evelyn," she said gently. "We must wake some of the little ones and keep them moving." One after another they got them to their feet, those weary youngsters. Some, unable to understand, protested, weeping. Others did their brave best to help. It was nearly noon when, as the wind subsided, Jack said the words that struck terror to his sister's heart.

"I'm going now, Nancy." His voice trembled a little. "As I see it, there's no other way. Keep up your courage; and for God's sake, Nancy, keep fighting. Unless the wind starts up again I'll reach that ranch in a few hours."

"And—if you—don't?"

Their eyes met, and Nancy knew her brother realized how slim a chance he had. Her lips trembled; but he made a gesture toward the children.

"I know—but I can't let them die, Nancy, while there's a chance to save them. But" (turning to the boy who wore his jacket), "I'm going for help and it looks as if I'd have to take that coat. No, I won't need the socks" (as the little boy stomped bravely to remove them). "Tom Osgood, you keep the kiddies moving. I'm counting on you older ones to help."

"Look here," spoke up the boy suddenly, "you find a fence, Jack, and follow it if you can. Dad told me once that if ever I got caught out in a blizzard, to find a fence and just hang onto it. And if you run into a mail box you'll know a gate is somewhere near. Good! Jack, I—sorter wish you wouldn't go."

Jack forced a smile. "Now don't you worry, kid. I'll get there sure, so long as the wind stays quiet. You just help Nancy every way you can; and whatever happens, don't go to sleep. Keep thinking that by night we'll be safe home. Good—goodbye—every one." He did not look at Nancy as he strode away. The girl knew that he did not dare to; and in another moment his tall form was blotted out. What fate would meet him, alone on those terrifying plains, she wondered, tears stinging her eyelids. And with a clutch of fear, was the wind rising?

Time passed, interminable hours that seemed unending. The dreaded wind died down, returned, and died again, not to return. No one could say just when the blizzard ceased, for one by one the children were succumbing to the portentous drowsiness. Once Nancy succumbed herself, to be aroused by the frantic, pounding fists of Tommy Osgood.

The cold was still intense when that second dusk approached the prairies; but the whimpering voices were hushed in an ominous silence. Most of the children had given up by now, completely spent with cold, and hunger, and even fright. For there had been strange happenings since Jack's departure. Twice they rejoiced at the sound of approaching horses, only to find that their ears must have deceived them. Two of the children had "seen" the school-house, and, as the mirage faded, burst into tears of disappointment.

Working courageously on icy arms and legs, Nancy knew, a sense of terror creeping through her, that she was giving out. Her eyelids kept closing against her will. At times it seemed impossible to drag them open. Her hand were numb; her bare legs curiously lifeless.

# AIR CELL battery lives on air for 1000 hours..

Here is the "A" battery which has revolutionized the radio industry. It is making the battery set as efficient, and as simple to operate as an electric receiver.

Eveready Air Cell needs no recharging. It energizes itself by "breathing" oxygen—it literally "lives on air" for 1000 playing hours.

With the Air Cell there is no gradual slackening of power which so often spoils radio reception. It maintains itself at full strength to the end.

Don't envy your city friends who have electrically operated radio sets. Now you can have the same clear reception with no trouble or bother. That is, if you buy a new Air Cell Radio.

These new sets, now made by all Canadian radio manufacturers, use the Eveready Air Cell "A" battery which does away with storage batteries and needs no recharging.

The amazingly long life of the Air Cell—with no upkeep costs—gives you true economy.

Eveready Layerbilt "B" Battery is the ideal companion.

### Will Not Face Storm

Experiment Was Conducted In France With Carrier Pigeons

Carrier pigeons won't carry on in a storm this shattering another cherished illusion of devotion to duty. An experiment was carried out by French military experts and pigeon fanciers in the Bases-Landes radio station here where atmospheric conditions similar to an electrical storm were produced. This was done by generating powerful "charges" of Hertzian waves of 200 amperes. At the same time several hundred military pigeons were released from their cages. Sensing an electrical storm, the pigeons hovered about the aerial a few minutes, then flew right back to their coots. They refused to budge until the "storm" was over.

### A Clever Photographer

Had Brilliant Idea When He Mistaken Customer's Address

A young man living at Weingarten, in Wurttemberg, had himself photographed, but the photographer mistook the address, to which the photograph should have been forwarded. What was the photographer to do? He stuck a proof of the photo on the outside of the envelope and added the words "To this gentleman in Weingarten." The photographs reached their correct destination safely.

A man could learn a great many things if he didn't think he already knew them.

### Little Helps For This Week

Even so Father, for so it seemed good in Thy sight. Matthew 11:26.

Let nothing make thee sad or fretful.

Or too regretful;

What God hath ordered must be right.

Then find in it thine own delight.

If we listen to our self-love we shall estimate our lot less by what it is than by what it is not, shall dwell on its hindrances and be blind to its possibilities, and comparing it only with imaginary lives shall indulge in flattering dreams of what we would do if we had the power, give if we had wealth, and be if we had no temptations. If we yield ourselves unto God and sincerely accept our lot as assigned by Him, we shall count up its contents and disregard its omissions, and be it as feeble as a cripple's or as narrow as a child's, we shall find in it resources of good surpassing our greatest aims, and sacred claims that will keep awake our highest will.

Teacher: "Give me an explanation of three punctuation marks."

Boy: "A comma is the brake that slows down the speed; an exclamation point is an accident, and a period is a bumper."

It has been found that eyelashes grow about one-twentieth of an inch each week.

strode away. The girl knew that he did not dare to; and in another moment his tall form was blotted out. What fate would meet him, alone on those terrifying plains, she wondered, tears stinging her eyelids. And with a clutch of fear, was the wind rising?

Time passed, interminable hours that seemed unending. The dreaded wind died down, returned, and died again, not to return. No one could say just when the blizzard ceased, for one by one the children were succumbing to the portentous drowsiness. Once Nancy succumbed herself, to be aroused by the frantic, pounding fists of Tommy Osgood.

The cold was still intense when that second dusk approached the prairies; but the whimpering voices were hushed in an ominous silence. Most of the children had given up by now, completely spent with cold, and hunger, and even fright. For there had been strange happenings since Jack's departure. Twice they rejoiced at the sound of approaching horses, only to find that their ears must have deceived them. Two of the children had "seen" the school-house, and, as the mirage faded, burst into tears of disappointment.

Working courageously on icy arms and legs, Nancy knew, a sense of terror creeping through her, that she was giving out. Her eyelids kept closing against her will. At times it seemed impossible to drag them open. Her hand were numb; her bare legs curiously lifeless.

### Making Accurate Clock

What is claimed to be the most accurate clock in the world—one that will not vary more than one quarter of a second in a year—is being made by a London firm for presentation to Greenwich Observatory.

Birds' nests used by the Chinese for making into soup are about the size of an oyster-shell and it takes thirty-two to weigh a pound. The soup costs about \$2.50 a bowl.

## IN UP-TO-DATE STABLES

—Old Reliable Minard's

When horses come in to stable with wire-cuts or saddle boils, or cuts have called under, the thing to do is get the Minard's bottle at once, as Mr. David of Glenora, Manitoba, knows. He writes: "I like your Minard's Liniment. Like to have it in the house. I have found your Minard's Liniment especially good for barbed wire cuts on horses. A family doctor prepared Minard's Liniment over 50 years ago. Still invaluable in every stable and every house. 49

## JOHN DAVIS, CRAIGMYLE FARMER IS INJURED

John Davis, farmer of the Craigmyle district, met with a serious accident on Monday when he was run over by a blinder. The bull wheel of the implement went completely over the man, dislocating a small bone at the base of the spine. Dr. Argue, who is attending the patient in the Hanna hospital, reports that he is making good progress and that complete recovery is expected.—Hanna Herald.

## Local News

Mr Faulk, father of Mrs. A. Rosenau, and two sisters, Mrs. Thomas and husband, Miss Faulk and friend all of Waukesha, Wis. who have been visiting here, left for their home last week.

Mr. A. Rosenau and son and J. Rosenau left this week for Delia where they will assist with the harvest work.

Miss Mabel Rowland, of Aldersyde, is at present visiting at the Todd home. She and Miss Mac Todd arrived Friday from Calgary.

Vincent Rideout left Tuesday for Edmonton where he will attend the University of Alberta.

Jas. Duck was a Calgary visitor this week.

Walter Rosenau had a very narrow escape from being attacked on his father's farm, by a ferocious bull. His only escape was to run into a nearby slough of water, when the animal ceased to follow him.

Mrs. K. N. Myhre left for Stanmore Wednesday.

No prize money in connection with the School Fair will be paid out until all the Fair funds have been collected.

## The Friendly Circle

The Friendly Circle held Oct. 22nd, at the home of Mrs. P. Petersen. Nineteen members also visited were present. Mrs. Laurence Peterson having donated a fruit cake, tickets at a dime each for a guess on the weight of the cake were distributed.

Mrs. Dressel winning the cake, the proceeds going towards the Friendly Circle fund. Mrs. Russell Marr will be hostess to the circle on Oct. 31.

## Ladies Card Club

The Ladies' Card Club met Tuesday night with Miss Wildred Willigan as hostess. Honors went to Mrs. Peyton and Miss Marjorie Lee. Mrs. Peyton will entertain the club next week.

## CHINOOK UNITED CHURCH

Sunday, Sept. 29th.

Sunday School 10:30 a.m.  
Church Service 11:30 a.m.  
Come and bring your friends

Rev. J. W. Smiley  
Pastor

## Chinook W. I. Meeting

The regular meeting of the Chinook W. I. was held at Mrs. Chapman's with fourteen ladies present. It was decided to hold a tea and bazaar this fall, the exact date, to be decided later.

The short course in "Home Nursing" is to be sent for and passed around among the members. Mrs. Rideout gave an exhibition of handicraft, showing articles made of cloth, flou sacks and discarded silk pieces. A complete demonstration of how to rug fr. m gunny sacks was given and proved very interesting.

A dainty lunch was served at the close by Mrs. Marcy and Mrs. Chapman.
